

# MUHAMMAD HAFIZ RUSLAN

Senior PHP Programmer | AI-Assisted Full-Stack Developer

Kuala Lumpur / Selangor • hafizcoolman@gmail.com • +60192334157

[linkedin.com/in/hafizruslan98](https://linkedin.com/in/hafizruslan98) • [hafizr.com](https://hafizr.com)

## PROFILE

Senior PHP Programmer and AI-assisted full-stack developer with 5+ years of experience building Laravel, Vue.js and Node.js systems for government and enterprise clients. Currently serving as Lead Programmer across multiple projects, owning technical planning, requirement alignment and client communication. Known for turning slow, complex systems into fast and reliable ones: from processing 160–240M applications yearly to cutting a 3-minute report down to under 3 seconds. Also drives DevSecOps CI/CD practice and company-wide AI adoption, and has mentored 15+ developers and interns. Uses AI to the fullest across the whole delivery cycle, from requirement analysis and coding with Claude Code and Antigravity to AI-assisted end-to-end testing and self-hosted models via LM Studio and LiteLLM, to ship faster without sacrificing quality.

## CORE COMPETENCIES

- Full-Stack Web Development (PHP, Laravel, Vue.js, Node.js)
- Technical Leadership, Planning & Client Communication
- High-Volume Data Processing & Database Optimization (OLAP, ClickHouse, PostgreSQL)
- DevSecOps & CI/CD (GitLab, SAST, DAST, VAPT)
- Data Migration, ETL & Reporting Dashboards
- AI-Assisted Development (Claude Code, Antigravity, LM Studio, LiteLLM), AI Adoption & Proof of Concepts

## CAREER HIGHLIGHTS

- Won **Innovation of the Year 2024** (Singapore) for a Transport Management System built from scratch with a team of 3.
- Engineered processing for 16M+ applicants and **160–240M applications yearly** on a national-scale placement system.
- Replaced a Power BI solution with an engineered backend and OLAP database: report generation cut from **3 minutes to under 3 seconds**, with 14M daily rows processed in about 1 second.
- Built a LaTeX invoice engine generating **1,000+ page invoices in seconds** for large clients.
- **Core Solution Architect** in the company's GitLab partnership; mentored 15+ staff and interns.

## PROFESSIONAL EXPERIENCE

### Senior PHP Programmer

Unijaya Resources Sdn Bhd • Kuala Lumpur City Centre • Jun 2025 – Present

- Serve as Lead Programmer across multiple government and enterprise projects, owning technical planning, requirement alignment and client communication.
- Core Solution Architect in the company's GitLab partnership and Git lead for the engineering team; introduced full CI/CD pipelines with a DevSecOps flow (SAST, DAST, VAPT) across multiple projects.
- Championed company-wide AI adoption, scaling from an initial Google AI subscription to an Anthropic (Claude) plan, and drove collaborations with GitLab, NVIDIA, HPE and Huawei.
- Delivered proofs of concept for emerging technology, including AI film content classification, sovereign (on-premise) AI meeting transcription and live dashboards over millions of records.

Key projects: National Placement System, Transaction Analytics Platform, Registration & Reporting Platform, Legacy Workflow System (see Key Projects).

## PHP Programmer

IMT Tech Sdn Bhd · Bangsar South, KL · Jul 2023 – Jun 2025

- Developed a customized booking system with adaptive working hours and days, managing **300+ meeting rooms** across an 80+ level building.
- Self-taught in Vue.js and built packages tailored to legacy systems, improving user experience with every implementation.
- Developed frontend and backend data-migration packages that reduced client data migration from **hours to minutes**, while keeping module logic simple for developers to extend.
- Delivered output on par with senior team members with 10+ years of experience.

Key projects: LaTeX Invoice Engine, Transport Management System (see Key Projects).

## PHP Developer

Unijaya Resources Sdn Bhd · Kuala Lumpur City Centre · Sep 2021 – May 2023

- Grew from Laravel beginner to senior full-stack developer and technical advisor to **15+ staff and interns**.
- Developed and maintained **14 government projects** with complex modules and workflows, ensuring functionality and scalability.
- Advised on technical decisions across 7 projects, improving performance by **up to 170%** through API optimization, database tuning and server load improvements.
- Contributed 2 in-house packages (role, permission and module-status flow; server file handling) that cut prototype-to-development time by **60%**.
- Led a team of 3 to deliver a helpdesk system inside an existing project in **1 week**, from requirements to production.
- Designed a parallel Talend ETL flow that extracts, transforms and stores **100,000+ records** from an external source in **8 seconds**.

## Lead Programmer Intern

Leadmind Sdn Bhd · Cyberjaya, Selangor · Mar 2021 – Aug 2021

- Sole developer, owning delivery of the company's internal systems end to end.
- Built a Java and Apache system to manage company data, then upgraded to the MERN stack (MongoDB, Express, React, Node.js) to deliver a website managing **1,000+ leads**.
- Improved user experience with smooth navigation and fast algorithms that deliver accurate leads data, picking up new technologies quickly with minimal guidance.

## KEY PROJECTS

---

### National Placement System

Unijaya Resources · 2025 – Present

**Role:** Lead Programmer (took over mid-project)

**Challenge:** Inherited a project with misaligned requirements that had to filter placements for **16M+ applicants** across **160–240M applications yearly** by posting criteria.

**Solution:** Re-planned delivery and realigned requirements with the client; combined backend logic with database-level processing to sync and filter the data efficiently.

**Impact:** Reliable, accurate processing output at national scale and a client relationship built on trust and clear communication.

### Transaction Analytics Platform

Unijaya Resources · 2025 – Present

**Role:** Lead Programmer & Git lead

**Challenge:** The client's Power BI dashboards took 3 minutes to generate over 14M rows of raw daily transactions.

**Solution:** Replaced Power BI with a lean, well-engineered backend and an OLAP database suited to the workload; set up full CI/CD with a DevSecOps flow (SAST, DAST, VAPT).

**Impact:** Full report generated in **under 3 seconds** and 14M rows processed in about 1 second; praised by the client and delivered **ahead of schedule**.

**Tech:** ClickHouse (OLAP), GitLab CI/CD, DevSecOps (SAST, DAST, VAPT)

## Registration & Reporting Platform

*Unijaya Resources · 2025 – Present*

**Challenge:** A large core module needed new forms and features, and dashboards had to handle many criteria types across in-house, external and reporting views.

**Solution:** Built a decoupled form-builder layer around the core module, and designed a custom backend algorithm for multi-criteria dashboard logic.

**Impact:** New features shipped without touching core code; dashboards stay usable and easy to rebuild.

## Legacy Workflow System

*Unijaya Resources · 2025 – Present*

**Challenge:** New workflow logic had to be added to an old system without breaking it, and tester feedback loops were slow.

**Solution:** Integrated the new workflow carefully into the legacy codebase and introduced AI-assisted end-to-end (E2E) testing.

**Impact:** Passed UAT/FAT in a **single session**.

## Transport Management System

*IMT Tech · 2023 – 2025*

**Role:** Developer, then Lead Developer for Phase 2

**Challenge:** Manage 40+ vehicles and 2,000+ passengers with a complex prospect-to-passenger workflow and weekly rostering.

**Solution:** Built the system from scratch with a team of 3, with real-time tracking, status updates, notifications and multi-layered validation; led Phase 2 maintenance and enhancements.

**Impact:** Won **Innovation of the Year 2024** in Singapore.

**Tech:** Laravel, Vue.js, Node.js, GitLab

## LaTeX Invoice Engine

*IMT Tech · 2023 – 2025*

**Challenge:** Large clients needed invoices of 1,000+ pages generated quickly, including on legacy projects.

**Solution:** Implemented LaTeX as an alternative PDF generator and built a tailored wrapper package for legacy project requirements.

**Impact:** **1,000+ page invoices generated in seconds**; adopted by many large clients.

**Tech:** Laravel, LaTeX

## EDUCATION

---

### Bachelor of Science in Computer Science

*Universiti Teknologi MARA (UiTM) · Jasin, Melaka · Mar 2018 – Aug 2021*

CGPA 3.53, First Class Honours

Relevant coursework: Data Analysis, Software Engineering, Algorithm, Artificial Intelligence

### Science PST Module II (Matriculation)

*Kolej Matrikulasi Selangor · Banting, Selangor · Jun 2016 – Jun 2017*

CGPA 3.83

## AWARDS & PARTNERSHIPS

---

- **Innovation of the Year 2024** (Singapore), Transport Management System, IMT Tech

- **Core Solution Architect**, GitLab partnership, Unijaya Resources
- AI and infrastructure collaborations with NVIDIA, HPE and Huawei, Unijaya Resources

## TECHNICAL SKILLS

---

**Languages & Frameworks:** PHP, Laravel (v5 – v11), Vue.js (v2 – v3), React, Node.js, Express, JavaScript (ES6), Java (Android Studio), HTML/CSS

**Databases & Data:** MySQL, PostgreSQL, ClickHouse, MongoDB, SQLite, Talend V8

**DevOps & Tools:** Git, GitHub, GitLab CI/CD, DevSecOps (SAST, DAST, VAPT), Apache, LaTeX

**AI Tools:** Claude Code, Antigravity, LM Studio, LiteLLM

## LANGUAGES

---

**Languages:** Bahasa Melayu (native), English (professional)

## PERSONAL DETAILS

---

**Nationality:** Malaysian

**Notice Period / Availability:** 3 months

**Expected Salary:** RM 8,000 and above
