PROFESSIONAL SUMMARY

Senior PHP Programmer and AI-assisted full-stack developer with 5+ years of experience in Laravel and Vue.js, leading delivery for government and enterprise clients. Built high-volume data platforms (160M+ applications yearly; 14M daily transactions processed in about 1 second), DevSecOps CI/CD pipelines and an award-winning transport management system (Innovation of the Year 2024, Singapore). Uses AI tools (Claude Code, Antigravity, LM Studio, LiteLLM) across the whole delivery cycle, from planning and coding to E2E testing, to ship faster with higher quality.

PROFESSIONAL EXPERIENCE

UNIJAYA RESOURCES SDN BHD

Kuala Lumpur City Centre

Senior PHP Programmer

Jun 2025 - Present

- Serves as **Lead Programmer** across multiple government and enterprise projects, owning technical planning, requirement alignment and client communication.
- Core Solution Architect in the company's **GitLab partnership** and Git lead for the engineering team.
- Championed **company-wide AI adoption**, scaling from an initial Google AI subscription to an Anthropic (Claude) plan, and drove collaborations with GitLab, NVIDIA, HPE and Huawei.
- Delivered **proofs of concept** for emerging technology, including AI film content classification, sovereign (on-premise) AI meeting transcription and live dashboards over millions of records.

Selected Project Experience

- **National Placement System**
 - Took over as Lead Programmer mid-project, re-planned delivery and resolved misaligned requirements, earning strong client trust.
 - Engineered high-volume processing for **16M+ applicants** and **160–240M applications yearly**, filtering placements by posting criteria through combined backend and database optimization.
- **Registration & Reporting Platform**
 - Extended a large core module through a decoupled form-builder layer, adding features without modifying core code.
 - Designed a custom backend algorithm for multi-criteria dashboards serving in-house, external and reporting views, built to be easy to rebuild and extend.
- **Legacy Workflow System**
 - Added new workflow logic to a legacy system without breaking existing functionality.
 - Introduced AI-assisted end-to-end (E2E) testing to shorten tester feedback loops; passed UAT/FAT in a **single session**.
- **Transaction Analytics Platform**
 - Built full CI/CD pipelines for multiple projects with a DevSecOps flow covering SAST, DAST and VAPT.
 - Replaced the client's Power BI solution with an engineered backend and OLAP database, cutting report generation from **3 minutes to under 3 seconds**.
 - Processes **14M rows** of raw daily transactions in about 1 second; praised by the client and delivered **ahead of schedule**.

Technology Used: Laravel, Vue.js, Node.js, PostgreSQL, ClickHouse, GitLab CI/CD, DevSecOps (SAST, DAST, VAPT), Claude Code, Antigravity, LM Studio, LiteLLM

IMT TECH SDN BHD

Bangsar South, KL

PHP Programmer

Jul 2023 - Jun 2025

- Implemented LaTeX, an alternative PDF generator, customized to generate **1000+ pages of invoice** in under a few seconds and successfully satisfied many big clients. For legacy project implementation, developed a tailored wrapper package to cater to specific LaTeX requirements.
- Developed a customized booking system with adaptive working hours and days, capable of managing 300+ meeting rooms across an 80+ level building.

- **Self-taught in Vue.js**, capable of creating packages tailored to legacy systems while enhancing user experience with every implementation.
- Developed migration data packages for both frontend and backend, streamlining the process of integrating client data into the system using sophisticated techniques. Proven to reduce migration time from hours to minutes while making it simple enough for developers to add or update logic of modules.

Selected Project Experience

- **Transport Management System**
 - Built from scratch in a team of 3, handling 40+ vehicles and **2,000+ passengers** with real-time tracking, status updates, and user notifications.
 - Managed a complex workflow converting prospects into passengers, followed by weekly rostering, while enforcing multi-layered validation, optimizing resource usage, and ensuring an exceptional user experience.
 - Lead developer responsible for maintaining and enhancing Phase 2 of the project.
 - Won the **Innovation of the Year 2024** award in Singapore.

Technology Used: Laravel, Vue.js, Node.js, GitLab, LaTeX

UNIJAYA RESOURCES SDN BHD

Kuala Lumpur City Centre

PHP Developer

Sep 2021 - May 2023

- Started as a fresh beginner in Laravel and grew into a senior full-stack developer, serving as a knowledgeable advisor to 15+ staff and interns, enhancing both productivity and the company's reputation.
- Developed and maintained **14** government projects featuring highly complex modules, integrated with intricate workflows and ensuring seamless functionality and scalability.
- Provided specialized advice and analysis on technical decisions impacting 7 projects, **improving performance by up to 170%** and enhancing stability through **API optimizations, database fine-tuning, and server load improvement.**
- Contributed **2 in-house packages** to create usable flow of role, permission and status of module, and server file handling which **decreased time taken** from turning prototype into development by 60%.
- **Led a team** of 3 people to create a helpdesk system inside an existing project in just **1 week** which includes taking requirement with client and pushing to production
- Utilized Talend software to design and implement an optimized ETL flow with parallel execution, enabling the **extraction of 100,000+ records** from an external source, transforming, and storing them in just **8 seconds.**

Technology Used: Laravel, Blade, GitHub, Talend

EDUCATION

UNIVERSITI TEKNOLOGI MARA (UiTM)

Jasin, Melaka

Bachelor of Science in Computer Science

Mar 2018 - Aug 2021

Cumulative GPA: 3.53; First Class Honours

SKILLS

- **Languages & Frameworks:** PHP, Laravel (v5 - v11), Vue.js (v2 - v3), React, Node.js, JavaScript (ES6), Java, HTML/CSS
- **Databases & Data:** MySQL, PostgreSQL, ClickHouse, MongoDB, Talend V8
- **DevOps & Tools:** Git, GitLab CI/CD, DevSecOps (SAST, DAST, VAPT), LaTeX
- **AI Tools:** Claude Code, Antigravity, LM Studio, LiteLLM
